Coventry Physical Activity and Health Integrator Provider Procurement
Question and Answers

Questions and Answers Added 11/09/26

Q1: "Applications are welcome from local organisations or providers with direct access to patients and NHS communication platforms." Does this refer to access to IT referral systems such as e-RS or EMIS Web?"

A1: The successful provider will ideally be an NHS organisation, or have an established position within the local health and care system, with direct routes to NHS professionals and teams, including GP, PCN and Integrated Neighbourhood Team colleagues, as well as appropriate access to patients. This will likely include access to NHS communication channels, such as an NHS email address, access to IT referral systems and established routes to engage and influence from within the health system.
